

## HOW IS IDD THERAPY® ADMINISTERED?

IDD Therapy® is administered only by the Spina System™, a state-of-the-art orthopedic machine. The Spina System™ is certified to deliver genuine spinal distraction in a comfortable and soothing manner, resulting in maximum pain relief!

The stereo CD system with headphones offers a choice of soothing sounds or music.

Patient data is entered into the computer.

The movable arm creates the angle of distraction enabling the IDD Therapy® specialist to target a specific segment of the spine for treatment.

Rays from a blue light promote relaxation.

A certified back pain specialist manages each 25-minute treatment session. The course of therapy includes approximately 20 treatment sessions.

The treatment table is designed with comfort and safety in mind. The bed rotates into position to easily accommodate patients.

# IDD THERAPY

## WHAT RESULTS CAN I EXPECT?

- 1 PAIN RELIEF EVEN AFTER JUST A FEW SESSIONS
- 2 SHRINKAGE OF DISC HERNIATION
- 3 INCREASED MOBILIZATION
- 4 QUICKER RETURN TO WORK
- 5 FEWER INCIDENTS OF BACK PAIN AND DEBILITATION
- 6 RETURN TO ACTIVE LIFESTYLE

The patient is secured to the Spina System with both a chest and pelvic harness.

## DO YOU SUFFER FROM...

- Herniated or Bulging Discs?
- Degenerative Disc Disease?
- Posterior Facet Syndrome?
- Sciatica?
- General Low Back Pain?

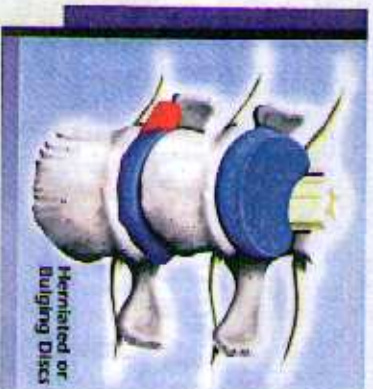

## ARE YOU A PRE OR POST-SURGICAL BACK PATIENT?

You may want to consider a non-invasive, non-surgical treatment modality for back pain that is experiencing a success rate of 86% or better!

## WHAT IS IDD THERAPY?®

**INTERVERTEBRAL DIFFERENTIAL DYNAMICS (IDD) THERAPY** consists of a set of medical treatment programs developed by a team of renowned neurologists, orthopedists, and neurosurgeons to rehabilitate and heal damaged structures in the spine. The protocol is non-invasive and does not involve drug therapy. These low back specialists conducted extensive clinical studies to validate the remarkable results obtained with IDD Therapy®.

A significant component of this medical regimen incorporates the use of a patented orthopedic machine. This device, called the Spina™ machine, promotes self-healing through effective distraction of the spine.

## WHAT ARE THE BENEFITS OF IDD THERAPY®?

- 1 No surgery is involved.
- 2 Medical procedure is non-invasive.
- 3 No recovery period is necessary, unlike surgery.
- 4 Cost of treatment is minimal compared to the cost of surgery.
- 5 Insurance companies will reimburse for this treatment depending upon policy coverage.
- 6 Financing for treatment is available under most circumstances.
- 7 Treatments are not only safe and painless, but comfortable and relaxing as well.
- 8 Non-strenuous work can continue during the treatment regimen.

“I could hardly walk. After the first treatment, I could tell the difference. After the third or fourth treatment, I was starting to feel like I did years ago. I thought I would never be able to do half the things that I can do now. This would have never happened if I had not tried IDD Therapy®. I would advise anyone with a lower back problem to have this treatment... They will never regret it. **IDD Therapy® is the best way to go!**”

## WHY SHOULD I CONSIDER IDD THERAPY®?

Traditionally, surgery, pain medications and manipulation have been the primary treatments employed by doctors to address most organic problems involving the spine. The complications from back surgery can be severe and may result in permanent debilitating conditions. Pain medications can make it difficult for a person to carry-on with normal day-to-day activities. Surgery can be very risky and extremely expensive with recovery taking several months. Thousands of back pain patients have been successfully treated with IDD Therapy® WITHOUT surgery or injections.
